

FAASTeam presents:

Icing Insights Encore Presentation

Whether your airplane is certified for Flight Into Known Icing (FIKI) or not, icing is a hazard that should have every pilot on alert. Understanding the impact icing can have on a flight means knowing where favorable icing conditions are forecast, at what altitudes and over which regions. In this encore presentation of our Icing Insights webinar, we'll show you how to get the most out of the latest icing detection and forecasting tools, as well as provide a few insights that will help make you more confident when it comes to planning and operating in and around icing conditions.

Directions: To attend the Icing Insights Encore Presentation webinar, please register using this link: <https://cc.readytalk.com/r/7i6oulofqasx&eom>
Once you register, you will receive a confirmation email that will contain your unique link to the webinar.
You will not need to register on the faasafety.gov site to receive credit for attending this online webinar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
